DCI-JA Section 2. Hazards identification

See toxicological information (Section 11) Section 3. Composition/information on ingredients

Mixture Substance/mixture Ingredient name 15 - 30 4.99 - 9.99 Xylene ethylbenzene

Any concentration shown as a range is to protect confidentiality or is due to batch variation

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting

Occupational exposure limits, if available, are listed in Section 8,

Section 4. First aid measures

Inhalation

Skin contact

Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. Eye contact

Remove viction to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Flush contaminated skin with plenty of water, Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing

shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Remove dentures if any. Wash out mouth with water. Stop if the exposed person feels sick as vomiting may be dangerous. Remove victim to fresh air and keep at rest in a position comfortable for breathing. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person, if unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, bett or waistband.

Most important symptoms/effects, acute and delayed

Potential acuite health effects

Eve contact Causes eye irritation,

Inhalation No known significant effects or critical hazards,

Skin contact Causes skin irritation No known significant effects or critical hazards Ingestion

Over-exposure signs/sympt

Date of issue/Date of revision 2018-03-05 *3*/13

Section 2. Hazards identification

This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910,1200).

FLAMMABLE LIQUIDS - Category 3 SKIN IRRITATION - Category 2 Classification of the substance or mixture

EYE IRRITATION - Category 28 CARCINOGENICITY - Category 2

GHS label elements Hazard pictograms

Warning Signal word

Hazard statements H226 - Flammable liquid and vapor. H315 + H320 - Causes skin and eye irritation.

H351 - Suspected of causing cancer

Response

Storage

Prevention

P201 - Obtain special instructions before use,
P202 - Do not handle until all safety precautions have been read and understood,
P280 - Wear protective gloves: > 8 hours (breakthrough time); Vilon®; 1 - 4 hours
(breakthrough time): nitrile rubber. Wear eye or face protection: Recommended: splash

oggoles. Wear protective clothing.
P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P241 - Use explosion-proof electrical, ventilating, lighting and all material-handling

equipment
P242 - Use only non-sparking tools,
P243 - Take precautionary measures against static discharge,
P233 - Keep container tightly closed.
P264 - Wash hands thoroughly after handling.

P264 - Wash hands thoroughly after handling.
P308 + P313 - I Fe wposed or concerned: Get medical attention.
P303 + P313 - I Fe wposed or concerned: Get medical attention.
P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower:
P302 + P352 + P352+P364 - IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse.
P303 + P313 - If is kin irritation occurs: Get medical attention.
P305 + P351 + P338 - IF IN EVES: Rinse cautiously with water for several minutes.
Remove contact lenses. if present and easy to do. Continue rinsing.
P337 + P313 - If eye irritation persists: Get medical attention.

P405 - Store locked up. P403 - Store in a well-ventilated place.

P235 - Keep cool.

P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations. Disposal

Hazards not otherwise None known,

Farget organs

Contains material which may cause damage to the following organs: blood, kidneys, the nervous system, liver, gastrointestinal tract, upper respiratory tract, skin. central nervous system (CNS), ears, eye, lens or cornea.

Date of issue/Date of revision 2018-03-05 2/13

Section 4. First aid measures

Adverse symptoms may include the following: pain or Irritation watering redness

No specific data.

Skin contact Adverse symptoms may include the following:

redness

Indication of immediate medical attention and special treatment needed, if necessary

Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. Notes to physician

Specific treatments No specific treatment,

No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. rotection of first-aiders See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media Suitable extinguishing

Flash point

: Use dry chemical, CO2, water spray (fog) or foam. Unsuitable extinguishing

Specific hazards arising

Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard. from the chemical

Decomposition products may include the following materials: carbon dioxide carbon monoxide Hazardous thermal decomposition products

Special protective actions for fire-fighters

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Special protectiv nt for fire-fighters

Closed cup: >34°C (>93.2°F) [ASTM D93 (B)]

Section 6. Accidental release measures

Personal precautions, i equipment and emergency procedures

For non-emergency personnel

to equipment and emergency procedures

No action shall be taken involving any personal risk or without suitable training.

Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled materials. But off all ignition sources.

No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

If specialized cothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personner."

For emergency responders

emergency personnel".

Date of issue/Date of revision 2018-03-05 DCI-JA

Section 6. Accidental release measures

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused envir pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill

Large spill

Islamment and cleaning up

Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an intert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach releases from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or distomaceous earth and place in container for disposal according to local regulations (see Scition 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

cautions for safe handling

Protective measures

Put on appropriate personal protective equipment (see Section 8). Avoid exposure-obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ningest. Avoid breathing vapor or mist. Use only with adequate verification. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignifion source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges, Empty containers retain product residue and can be hazardous. Do not reuse container, Ealine, diplikhica and smoking should be repolibilated in areas where this materials.

anal hyg

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 6 for additional information on hygiene

inditions for safe storage, including any incompatibilities

measures.

Store in accordance with local regulations. Store in a segregated and approved area. Store in a dry. cool and well-ventilated area, away from incompatible materials (see Section 10). Store locked up. Eliminate all lightion sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental containments.

Date of issue/Date of revision

5/13

Section 8. Exposure controls/personal protection

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is nacessary to avoid exposure to liquid splashes, mists gases or dusts. If contact is possible, the following protection should be worn, unit the assessment indicates a higher degree of protection: chemical splash goggles. Recommended splash goggles.

Skin protection

Hand protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove manufacturers, in the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. > 8 hours (breakthrough time) video.

Body protection

time): Viton® 1 - 4 hours (breakthrough time): nitrile rubber Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of lightlion from static electricity, wear antistatic protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection

Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: organic vapor filter (Type A)

Personal protective

Section 9. Physical and chemical properties

Appearance

Physical state Liquid, [Clear,] Color Brown. [Dark] Odo Aromatic. Odor threshold Not available Not available

Melting point Not available

TWA: 100 ppm, 0 times per shift, 16 hours.

Appropriate engineering

Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or ose only with adequate ventilation. Use process encosures, local exhaust ventilation other engineering controls to keep worker exposure to airborne contaminants below ar recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

nmental exposure ontrols

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation, in some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce enjissions to acceptable levels.

Individual protection measures Hygiene measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation focation.

Date of issue/Date of revision 2018-03-05

Section 9. Physical and chemical properties

Highest known value: 1.2 kPa (9.3 mm Hg) (at 20°C) (ethylbenzene). Weighted average: 0.26 kPa (1.95 mm Hg) (at 20°C) Vapor press

Vapor density Highest known value: 3.7 (Air = 1) (xylene). Weighted average: 3.7 (Air = 1)

Density 0.95 g/cm³ [15°C (59°F)]

Specific gravity 0.952 Solubility

Insoluble in the following materials: cold water, hot water Not applicable

Partition coefficient: n-octanol/water Auto-ignition temperature Lowest known value: 431.85 to 459.85°C (809.3 to 859.7°F) (ethylbenzene).

Decomposition temperature Not available.

Section 13. Disposal considerations

The generation of waste should be avoided or minimized wherever possible. Disposal of this product solutions and any byproducts should at all times comply with the requirements of environmental protection and waste disposal legislation and
any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal
contractor. Waste should not be disposad of untreated to the sewer unless fully compliant with the requirements of all
authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when
recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when
handling empled containers that have not been cleaned or rinsed out. Employ containers or liners may retain emproduct
residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do
not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled
material and runoff and contact with soil, waterways, drains and sewers.
